

The Source of our Phone Refurb Power

A look inside the VOIP phone refurbishing process at CablesAndKits

Phone Defective Rate

Refurb Savings

Ever wonder what it takes to be a refurb phone? How will I know it's reliable? Does it have the strength to upstand all my calls? All those questions and more are answered- we've revealed the POWER of the refurb phone and its process!

Bridge OUT

1 Rescue

Captain Refurb flies from city to city saving all those in danger while searching for used phones that he can give a new life and home.

Inspection 2

Thoroughly Inspect phones
Scratches or wear outside of the normal use are rejected

Once he rescues the phones, his sidekick, Portable Boy, thoroughly inspects them making sure they are not outside the normal wear. He will only accept the best, anything less will not be accepted

3 Diagnostics & Testing

- Quality control and reassurance of proper working capabilities
- Reset to factory defaults and settings cleared

Portable Boy tests each phone making sure they are in tip top shape for usage. He takes his time in making sure the phones don't have any technical issues and all settings are reset to factory defaults.

Cleaning 4

Phones are given a good bath
Given a brand new handset and cord

Captain Refurb uses his super strength by removing any debris and replacing stickers, stands and bezels if needed. Brand new handsets and cords are also provided with each phone.

5 Repacking

- Packed in its custom box
- Secured by our CK Lifetime Warranty AND Lifetime Advance Replacement

After a full day of recruiting phones to join the refurb team, each phone is assigned a home. Each refurbished phone is placed in a custom box and stored until they are chosen by their new owners.
