

CWDM-SFP10G Datasheet

Product Overview: The CWDM-SFP10G transceivers are 10 Gigabit CWDM transceivers that are available in 8 different wavelengths from 1470nm to 1610nm. These transceivers are capable of reaching distances up to and support DOM.

Features and Benefits: The SFP-10G-SR offers a wide variety of features and benefits such as:

- **Small Form Factor** – This SFP+ transceiver boasts the smallest form factor for 10G connectivity
- **Hot-Swappable** – This transceiver can be added or removed to your devices without powering them down
- **Digital Optical Monitoring (DOM)** – This capability allows you to have increased visibility by monitoring signal strength, temperature, and transceiver supply voltage.
- **RoHS Compliant** – These transceivers are RoHS compliant.

Platform Support: These modules are supported on the following Cisco switches and routers:
